Mr. Anthony Gallegos
Division of Oil, Gas, and Mining
P. O. Box 145801
Salt Lake City, Utah 84114-5801

Dear Tony:

Enclosed are the revised and completed Transfer of Notice of Intention Forms for several properties operated by Star Stone Quarries, Incorporated.

I tried to reach you on March 15, but found out you were out of the office the rest of the week. I then spoke with Lynn Kunzler about the legal descriptions. I now understand that the legal descriptions only apply to the original Small Mining Operations or Exploration Project, and not to any expansions since then. The position of some of the development is not where it is shown in the legal descriptions. I changed those legal descriptions to match the position of the development on maps, and included the work maps to show you how I got the legal descriptions I changed.

Regarding the Aragonite Mine, Lon Thomas does not believe we have a Large Mining Operations permit. As he understands it, he has only a Small Mining Operations permit for Aragonite. I enclosed a signed Transfer of Notice of Intention for Small Mining Operations for the Aragonite Mine.

Sincerely,

David Ryzak
